Water Aerobics

**Deep Water:** Gives the benefits of weights, Aerobics and stretching in a nonimpact workout that focuses on burning calories and improving all aspects of physical fitness.

**Shallow Water:** A low impact class designed to promote joint flexibility, range of motion, and agility while building cardiovascular fitness and muscle strength.

- It increases aerobic endurance, improves flexibility and tones the body.

- It will strengthen your heart while toning your muscles.
- Provides 12 times more resistance than when you exercise on land.
- Water disperses heat more effectively to limit overheating.
- A 30 minute cardio comparison: Water walking burns approximately 264 calories in comparison to land walking at 135!
- Muscle soreness does not occur as frequently in water as on land aerobics due to the buoyancy of the water and reduced impact on the body.
